WCAG 2.1 LEVEL AA Compliance Achieved

OVERALL AUTOMATED ACCESSIBILITY OUTCOME

All three tools confirm that the BCHAIN-ACCESS prototype meets WCAG 2.1 Level AA. No accessibility errors, alerts, or violations were found; the single Lighthouse item is a deliberate cosmetic trade-off.

TOOLS COMPLEMENT EACH OTHER

Lighthouse provides a holistic audit, WAVE offers visual feedback and structural validation, and Axe DevTools ensures rigorous WCAG rule-based testing.
